

# Dysregulation in Families Impacted by Grief and Adverse Childhood Experiences (ACES) with Dr. Tanikka Price

## Learning Outcomes

- Identify various Adverse Childhood Experiences
- Interpret how Toxic Stress affects the brain and the body
- Recognize the bigger picture of how trauma experienced in childhood can be informing clients behavior
- Interpret how adverse childhood experiences can lead to dysregulation and adverse coping skills
- Express how adverse childhood experiences may affect one's ability to deal with grief
- Identify how personal trauma can impact working with clients.

**Register Now!**

**Are you interested in helping clients stuck in grief or trauma?**

Dr. Tanikka Price leads this self-paced session to support Community Health Workers (CHWs) as they work with community members to understand the impact of toxic stress, ACES, and grief on the brain. Participants will also gain an understanding of how personal trauma may impact the work they do with clients.

*Do you work with individuals who are unable to work on their lives due to events that have happened in the past?*

*Do you want to help them work through their own grief and trauma?*

*Then this is the session for you!*
