

KAER Toolkit for Brain Health Training

Wednesday, August 12, 2026 | 12:00 – 1:00 p.m. EST | Via Google Meet

The Gerontological Society of America (GSA) KAER Toolkit for Brain Health training is intended to support interdisciplinary care teams in implementing a comprehensive approach to initiating conversations about brain health, detecting and diagnosing dementia, and providing individuals and their care partners with community-based supports.

Featured presenter: **Jennifer L. Pettis**
MS, RN, CNE, Gerontological Society of America

Participants will:

- Learn about the GSA KAER framework and its benefits, and examine tools and resources that care teams can use to support brain health and improve cognitive impairment detection.
- Explore ways to promote brain health.
- Learn how signs and symptoms of cognitive impairment differ from normal age-related brain changes.
